

# CSC420 – Progress Report<sup>1</sup>

Make a copy of this progress report, then complete it. Submission instructions and a grading rubric are included below.

Your name: <replace me with your name>

Date: <replace me with the current date>

## Progress Report

- **Accomplishments:** What did you accomplish since the last class meeting, the last progress report, or since you started the project? If you didn't complete anything since the final report, enter **N/A**.

Since the previous progress report, I have gotten the city/state to specify which shelter page is scraped, as I wanted to accomplish in progress report 2.

I have also been able to **begin** linking the pages (home and resources), but this has proved to be a very painful process.

- **Future Goal:** What do you plan to accomplish before our report? These plans should be related to roadblocks or discussion points. If you plan to change direction, explain why.

Before our following report, I would like to get the pages fully synced together so that when I run my go file, it brings me to the home.html page, and I should be able to navigate the website from there.

- **Challenges:** What are your current roadblocks?

I am struggling to figure out how to link these pages together and use the directory routes in go. I have linked resources I am using to troubleshoot this issue in the readme, but it is coming along slowly.

- **Desired Discussion Points:** Do you have any desired discussion points unrelated to roadblocks?

The Go documentation is very in-depth, which is awesome, but it also leaves room for confusion when their built-in methods are similar.

## Submission to your Project github repository

1. Download the completed report as a PDF
2. Give your PDF a unique name, for example: **2023-02-21-progress-report.pdf**, obviously change the date as appropriate.
3. Add the PDF to your Project github repository, add it, commit it, and then push it by the due date listed in Moodle.

---

<sup>1</sup> This progress report is based on a Weekly Progress Report created by Dr. Nakazawa for CSC493

## Rubric:

The following rubric will be used, but they might change as needed.

### Accomplishments (3 points)

1 point for a general description of progress, 2 points for specifics on progress, 3 points for specifics AND referring to previous targets and explaining how currently accomplishments build on previous ones.

### Challenges (3 points)

1 point for mentioning there are roadblocks, 2 points for specifics, 3 points for specifics AND what was done already to try to overcome them.

### Desired discussion points (2 points)

1 point for at least one relevant discussion point as a general question, 2 points for relevant discussion points with specifics

### Future Goals (2 points)

1 point for concrete future targets (i.e. "working more on the project" is a zero, but "working on getting component X to interface with component Y" suffices), 2 points for tying in the targets with what was hopefully discussed in the meeting.
